Telegraph Receiver

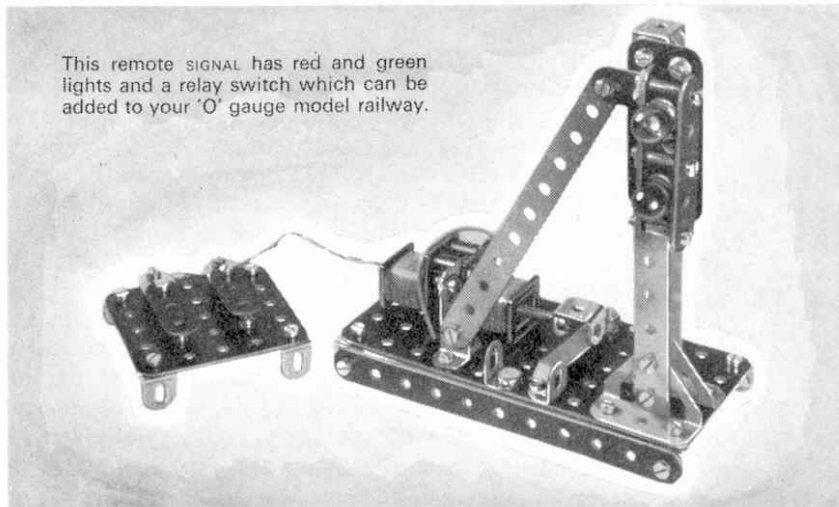

Morse Key

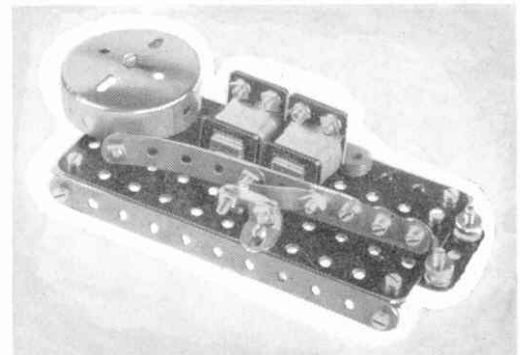

Tap out and receive secret messages from your 'agent' in another room with this TELEGRAPH RECEIVER with bell and MORSE KEY! A paper tape records the coded message which you can read afterwards.

Build a working ELECTROMAGNETIC CRANE and watch it automatically lift and carry metal objects.

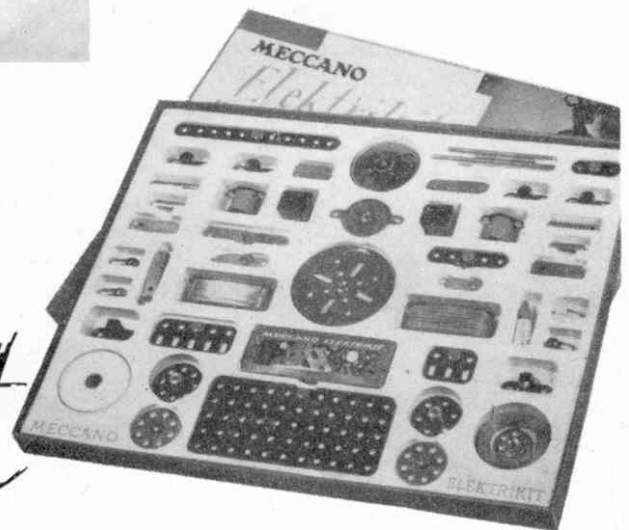

This remote SIGNAL has red and green lights and a relay switch which can be added to your 'O' gauge model railway.

Expecting a visit from friends? You can quickly and easily make this ELECTRIC BELL and fit it on your door.

Used with a No. 3 Meccano Outfit (or a larger one) and a power unit or small battery Elektrikit can make all these and dozens of other electrically operated models and motors. Free illustrated instruction book showing range of models with every kit. Only £3.17.11. U.K. price.
